The representatives of NATO countries geting together in two European cities this week

The NATO Parliamentary assembly continues to convene in Berline, where discussions focuses on Euro-Atlantic security. These questions have been lately on frame, not only due the continuation of Russia's war in Ukraine but also the intensifying hybrid threats and violations against Europe.

Germany has strengthened its preparations for potential acts of sabotage and terrorism by offering its agents broader powers to undertake protective actions to safeguard property and IT infrastructure, and carry out operations abroad. On the other hand, airspace violations have been reported in various Eastern members of the European Union and NATO, such as Romania, Estonia, Latvia and Lithuania. On the weekend, in the Gulf of Finland Ukraine attacked a Russian cargo ship with drones.
