Annabel Iyengar

The Role of Artificial Intelligence in Enhancing Global Peace Negotiation Processes

Timeframe: 31/01/2020 – 11/10/2025
Ukraine · Cyber Defence-Protection & Cooperation · Issue I

Key Insights

- How can AI support peace negotiations? AI can enhance conflict analysis, translation, and decision-making, addressing key challenges in complex peace processes. AI offers significant benefits but must remain a supportive tool under strict regulatory frameworks.

Definition

Retrieval-Augmented Generation (RAG): AI method combining LLMs with external data for context.

> *AI-assisted data analytics: AI can process vast datasets to guide negotiators in strategy*
