**JoaoPedro SouzaGohla**

*Bridging Operational Innovation and Governance in the AI-Driven Cyber Battlespace*

Timeframe: 11/10/2025 – 11/10/2025
European Union (EU) · Cyber Defence-Protection & Cooperation · Issue I

## Key Insights

- How can AI be used safely in NATO and EU cyber operations? AI boosts cyber defence but needs oversight, security, and coordination. Combining AI with regulation and collaboration strengthens defence and accountability.

## Definition

Artificial Intelligence (AI): Machines performing tasks that normally require human intelligence

> *AI enhances cyber defence but requires strict human oversight to prevent misuse*
